Smart Perimeter Protection for Demanding Environments

EDGE GUARD by CREO Composites is our advanced line of FRP (Fiber Reinforced Polymer) fencing systems—engineered to deliver secure, lightweight, and long-lasting perimeter solutions. Built in collaboration with top manufacturing partners, EDGE GUARD fences are ideal for corrosive, high-risk, and remote installations where zero-maintenance and non-conductivity matter most.

KEY OFFERINGS

Configurable Systems

Choose from panel-type, post-and-rail, or high-security fencing based on site demands.

Pipe Profiles

Available in square, round, or custom-profiled pipes for structural and design flexibility.

Resin Options

Engineered using UV-resistant, chemical-proof, or fire-retardant resins to suit application-critical needs.

Complete Accessory Kit

- Industrial-grade gates
- Locks and latches
- Brackets and support fittings
- Ready-to-install foundation systems

Applications Across Sectors

- Industrial & Chemical Facilities
- Wastewater & Water Treatment Plants
- Port & Marine Installations
- Highways & Roadside Infrastructure
- Railway Corridors & Substations
- Secure Zones & Restricted Access Sites

Why EDGE GRATE?

- ➔ 100% corrosion-proof for long life
- ➔ Non-metallic, non-conductive & fire-safe
- ➔ Lightweight yet structurally robust
- ➔ No painting or rust treatment required
- ➔ Quick installation with modular kits

Looking to secure a challenging perimeter?
