# Engineered Safety. Designed to Last.

EDGE LINE by CREO Composites stands for precision-crafted FRP (Fiber Reinforced Polymer) handrail systems, designed to meet the rigorous demands of industrial safety and architectural aesthetics. Built in collaboration with trusted global manufacturers, EDGE LINE handrails combine lightweight durability, corrosion resistance, and custom design flexibility.

## KEY OFFERINGS

### Custom Profiles

Available in square, round, and custom-engineered shapes to suit varied layouts and aesthetics.

### Bespoke Design Solutions

Designed to comply with site-specific safety regulations, ergonomic needs, and architectural codes.

### Resin Versatility

From orthophthalic for standard use to phenolic for high fire-resistance and chemical protection.

### Complete Installation Kit

- Mounting brackets
- End caps & connectors
- Stair adapters
- Finishing options (color, texture, UV resistance)

## Industries & Applications

- Water & Wastewater Treatment Plants
- Petrochemical & Oil Refineries
- Power Generation & Utility Facilities
- Marine Platforms & Offshore Structures
- Commercial & Public Architecture

## Why Choose EDGE LINE?

- Non-corrosive and weatherproof
- Lightweight for easy transport and installation
- Non-conductive for electrical safety
- Maintenance-free with long service life
- UV-resistant and available in vibrant colors

## Need a customized handrail layout or profile?

Let our CREO Composites team assist with technical support, CAD drawings, and project-specific recommendations.
